

Prostate - Responding to a PSA screening request

Overview

With a recent spotlight on PSA screening in the media, this course aims to assist primary care professionals in confidently discussing requests for PSA tests with patients. This course will present interactive video consultations with George Hyett, an asymptomatic, low-risk patient. These are accompanied by a range of activities to reinforce key learning points.

This course will support you to:

- Examine the advantages and disadvantages of testing asymptomatic males
- Increase confidence in responding to men asking for PSA testing
- Explore risk factors and the ways in which prostate cancer can present
- Confidently discuss PSA results and subsequent investigations with patients

Specialist interviews

- Mr. Satish Maddineni, Consultant Urologist, discussing the symptoms of prostate cancer and the importance of Digital Rectal Examinations (DRE)

Who is it for?

Primary care professionals across NHS England including GPs and Practice Nurses

1 CPD hour available

Royal College of General Practitioners

Feedback

"GatewayC give us the reassurance that we can rely on our own clinical judgement. It looks very accessible and will give you everything you need in one place" - GP user
